

TCR Data Analysis And Visualization On Fifa-19 Dataset

Information:-

Name-Amey Rajesh Avhad

Project Name-Data Analysis And Visualization On Fifa-19 Dataset

Libraries Used

Numpy

NumPy stands for Numerical Python. It is a Python Package for mathematical and logical operations on arrays in Python. It is used in most Python Projects Involving managing data sets. It is different from Lists.

Pandas

Pandas is a library in Python for Data Manipulation and analysis. It offers data structures and operations for manipulating tables and time-series data. Pandas is built on top of NumPy and can be integrated with third parties libraries.

Matplotlib

Matplotlib is a visualization library built on NumPy in Python for 2-D plots of arrays. It is useful to visualize and interpret large data sets. Matplotlib comes with a variety of inbuilt plots and offers lots of flexibility.

Seaborn

Seaborn is a Python data visualization library based on Matplotlib. It provides a high-level interface for drawing attractive and informative statistical graphics.

Importing Libraries

In [2]:	<pre>import pandas as pd import matplotlib.pyplot as plt import numpy as np import seaborn as sns</pre>
